

Drink Philly Tap

Philly tap water is healthy, affordable, and good for the environment. Bottled water is expensive, and pollutes our city and planet.

Safe & Healthy

- ★ Tap water is safe—it's treated and tested before it reaches your home.
- ★ Tap is treated with fluoride to help prevent cavities. It's recommended by dentists!

Save Money

- ★ Tap water in Philly costs less than a penny per gallon.
- ★ A gallon of bottled water costs more than a gallon of gas for your car. Save hundreds of dollars a year by switching to tap.

Save the Planet

- ★ Single-use bottles use fossil fuels to make, stock and transport.
- ★ Bottles create litter in our streets and pollute our rivers—even when they're recycled.

USING A FILTER?

Make sure the filter is National Sanitation Foundation approved. Look for the "NSF" seal.

MORE TIPS!

Better Taste!

Fill a covered pitcher and put it in the fridge to improve taste!

B.Y.O.Bottle

Take a reusable bottle with you! Express yourself with patterns or stickers.

Testing tap:

If your pipes might contain lead, the Philadelphia Water Department can test your tap for free. Call 215.685.6300.

Pledge to drink tap at www.drinkphillytap.org

Drink Philly Tap is a partnership of organizations committed to promoting tap water in Philadelphia.

EVERYDAY HEALTHY HABIT:

Run that tap!

Flush out water that's been sitting in your pipes.

USE COLD!

WHEN: **AM + PM**

Any time you haven't used water for **six hours**, like in the morning and after work or school.

HOW LONG: **3-5 MINUTES**

The time depends on how far your faucet is from the water main.
